**RURAL LABOUR ENQUIRY
1977-78**

**REPORT
ON
EMPLOYMENT AND UNEMPLOYMENT
OF
RURAL LABOUR HOUSE HOLDS**

(PART-I)

**LABOUR BUREAU
MINISTRY OF LABOUR GOVERNMENT OF INDIA
CHANDIGARH/SHIMLA**

PREFACE

The Indian sub-continent is basically rural. More than three fourth of the population spread over 5.57 lakh villages are dependent mainly on agriculture, which is not merely an occupation but a means of livelihood and a way of life to the millions. Improving the standard of life and general living conditions of the peasant and other labouring classes has been one of the major goals ever since the introduction of economic planning for establishing a 'socialistic pattern of society'. It has been the endeavour of the Government to alleviate the poorer sections of the society by formulating and implementing various target-oriented anti poverty rural development programmes. The need for adequate data base for formulating such action programmes was greatly felt. To this end in view, two Agricultural Labour Enquiries were conducted i.e. first in 1950-51 and the second in 1956-57, the scope of these two enquiries being restricted only to agricultural labour.

To enhance the scope and coverage, the first Rural Labour Enquiry (RLE) was conducted in 1963-65 covering not only agricultural labour but also rural labour. The second and third RLEs were conducted in 1974-75 and 1977-78, respectively. The second Enquiry was integrated with the 32nd N.S.S. round general Employment-Unemployment surveys of the National Sample Survey Organisation.

Unemployment and under employment constitute one of the major socio-economic problem in the rural areas where agriculture still continues to be dependant on rainfall. When the weather Gods fail, agricultural activities come to stand still flaring up scarcity and acute unemployment situation there by depriving even the meagre incomes of vast majority of rural masses. The problem of rural poverty is directly related to the existence of unemployment/under employment & low productive employment. Therefore, it is of paramount importance to study the nature and extent of unemployment/under employment and availability of employment in the rural areas for appropriate policy prescriptions including schemes for supplementary wage employment.

The present report (in 2 parts) deals with the "EMPLOYMENT & UNEMPLOYMENT" among Agricultural and Rural Labour Households. The data collected during 1977-78 Survey by the Field Operation Division were scrutinised by the Survey Design & Research Division of the N.S.S.O. and tabulated by the Computer Centre of the Department of Statistics. The report reflects Employment and Unemployment situation among agricultural/rural labour households. For the purpose of comparison, data pertaining to the previous Enquiry of 1974-75 are also presented in this Report.

I take this opportunity to express our thanks to the National Sample Survey Organisation for their valuable co-operation in the conduct of the Enquiry and scrutiny of data as also to the Computer Centre, Department of Statistics Ministry of Planning for processing of data.

This Report has been prepared by a team of officials under the overall guidance of Shri C.Chandramohan, Joint Director, ably assisted by Sh. A.S.Ahluwalia, Deputy Director, Shri Rajendra Prasad, Assistant Director, Shri Yog Raj, Investigator Grade - I, Shri Dila Ram Verma, Investigator Grade - II, and Shri Ral Lal Sharma, Computer. All the tables/statements and the write-up in the report were generated in Personal Computer at Shimla by a dedicated group of computers S/Shri Hari Ram, Pravesh Kumar, Ajay agarwal, Ravi Sood, Sanjay Verma, Ramesh kumar Puri, Surinder Sharma and Hemant Kumar. They provided excellent computer support. I am thank full to the team of officials entrusted with the task of preparing this report.

The views expressed in this report are not necessarily those of Government of India. Any suggestion towards improvement in the Report would be welcome.

B.P. GUHA
DIRECTOR

SHIMLA

Dated the 16th July, 1990.

**EXPLANATION TO NOTATIONS USED IN THE STATISTICAL TABLES
AND THE LIMITATIONS OF DATA PRESENTED THEREIN**

(-)	=	Nil
@	=	Negligible
With Land	=	Households possessing cultivated land
Without Land	=	Households not in possession of any cultivated land

Figures given under different columns/rows may not necessarily add up to give the respective totals due to rounding off.

"All Classes of Households" also include Households other than Scheduled Caste and Scheduled Tribe Households. Accordingly, the figures relating to the Scheduled Caste and Scheduled Tribe Households do not add up to give the figures under "All Classes of Households".

Caste-wise data for Andhra Pradesh was not available during 1977-78.

There was no Scheduled Tribe Household in the Sample in Jammu & Kashmir during 1977-78.

There was no reporting Scheduled Caste Rural Labour Households in the Sample in Manipur during 1977-78.

There was no Scheduled Tribe Household in the Sample in Haryana and Jammu & Kashmir during 1977-78.

There was no Scheduled Tribe Labour Household in the sample in Pondicherry during 1977-78.

The data for Karnataka State was not available during 1977-78 Survey.

EXPLANATION TO NOTATIONS USED IN APPENDIX - II

CHAPTER-I

SCOPE AND METHOD OF ENQUIRY

1.1 INTRODUCTION

According to the 1981 Census, 75.6 per cent of India's population was rural and in 1981-82 agriculture and allied activities contributed 37.2 per cent of the net domestic product at factor cost (at current prices). Still rural and agricultural labourers form the poorest strata of the Indian population. Ever since the inception of economic planning and the adoption of the goal of a "Socialistic System of Society" in India, it has been the endeavour of the government to alleviate the poverty primarily of this section of society by formulation and implementing adequate action programme. For this, it was essential to have at hand reliable and up-to date data pertaining to rural and agricultural labourers which, however, was not available at the time of Independence. Therefore, with a view to providing reliable data about their socio-economic conditions, the first Agricultural Labour Enquiry was conducted in 1950-51. During this enquiry, data were collected on various aspects such as employment, unemployment and earnings of individual workers and indebtedness of agricultural labour households. Later in 1956-57 the second Agricultural Labour Enquiry was conducted to collect comparable data.

The scope of these two enquiries which was restricted to agricultural labour (as their names imply), was widened in the subsequent surveys which were called Rural Labour Enquiries. Since in a country like India where rapid economic and social changes are taking place it was felt necessary to have up-to

date data in this regard, and the need for a fresh enquiry became imperative both to measure the impact of programmes and policies implemented and also to indicate directions for future line of action. It was in this context that Government of India decided in 1960 to conduct a third enquiry during the Third Five Year Plan in pursuance of which the 1963-65 enquiry was undertaken which was first in the series of Rural Labour Enquiry. Provisions was made in this survey to make the result available separately for agricultural labour households also in order to enable comparison with the results of the first two enquiries which covered only agricultural labour households. As the National Commission on Labour, appointed by the Government of India in 1966, acknowledged the unfulfulness of the data thrown up by these enquiries and recommended that "the periodic surveys undertaken by the Government to understand rural situation should be continued and intensified"; the second Rural Labour Enquiry was conducted in 1974-75 and was followed by another Rural Labour Enquiry in 1977-78. This Third Rural Labour Enquiry was integrated with Employment and Unemployment Survey of the NSS (32nd Round) so as to conduct all subsequent enquiries every five years to provide continuous data in the form of time series.

Under the integrated arrangement, besides the collection of data from the field, the processing thereof was also done by the National Sample Survey Organisation for the Labour Bureau.

The report has four parts each dealing with (i) Indebtedness of Rural Labour Households; (ii) Wages and Earnings of Rural Labour Households; (iii) Employment and Unemployment of

Rural Labour Households; and (iv) Household Consumption Expenditure of Rural Labour Households.

This part deals with "Employment and Unemployment" of Rural Labour Households.

1.2 OBJECTIVES

The main objectives of the Rural Labour Enquiry are:

- i. Preparation of fresh weighting diagrams for rural working class consumer price index numbers being compiled by the Labour Bureau.
- ii. Building up of reliable estimates of important socio-economic characteristics of rural labour in general and agricultural labour in particular, and
- iii. Study of trend and Variation in the socio-economic conditions of the rural labour households in general and agricultural labour households in particular during the plan period.

1.3 SCOPE

The enquiry related to all rural labour households including agricultural labour households. However, provision has been made in the tabulation plan to get separate estimated for agricultural labour households.

1.4 COVERAGE

The survey covers the whole area of the Indian union except (i) Sikkim; (ii) Ladakh district of Jammu & Kashmir; (iii) Rural area of Pal and Samri tehsils of district Surguja; (iv) Bijapur, Dalewara, Konta and Narayanpur tehsils of district Bastar of Madhya Pradesh; (v) Rajura, Sironcha and Godh Chiroli tehsils of district Chanrapur and Melgha tehsil of district

Amravati of Maharashtra; (vi) Rural areas of Chandigarh; (vii) Mizoram and Nagaland; (viii) Andaman & Nicobar Islands; (ix) Lakshadweep; and (x) Dadar & Nagar Haveli.

1.5 CONCEPTS AND DEFINITIONS:

The important concepts and definitions for the enquiry are as follows:

i. Household

A group of persons normally living together and taking food from a common kitchen constituted a household.

ii. Household size is the number of normally resident members of the households. Those persons who normally pass nights under the same roof and take food from the same kitchen will be considered as normally resident members, irrespective of the length of stay in the household. Normally resident members will exclude guests but include temporary absentees.

iii. Rural Labour Households

A household was classified as rural labour household depending upon its largest source of income. For this purpose, the following sources of income were considered.

- a. Wage paid manual labour (agricultural and/or non-agricultural);
- b. Non-manual paid employment; and
- c. Self employment (own account work and/or

employment as unpaid family worker).

A household was classified as rural labour household if its largest source of income was the first of the above three categories, i.e. if wage paid manual employment contributed more towards the income in the 365 days preceding the date of survey than other two sources taken individually.

"Manual Work" was taken to mean a job essentially involving some physical operations. However, a job, though essentially involving some physical labour what also requiring a certain level of general professional, scientific or technical education like that of engineers, doctors, dentists, midwives, etc., was not classified as manual work and on the other hand, jobs not involving much of physical labour and at the same time not requiring much educational background, like that of chowkidars, watchman, etc., were treated as manual work.

"Wage-paid Manual Labourer" was considered to be one who did manual work in return for wages in cash or in kind or partly in cash and partly in kind (excluding exchange labour). Salaries for manual work were also counted as wages. A person who was self employed in manual work was not treated as wage paid manual labourer.

iv Self employed persons :

A person was regarded as 'self employed' in an occupation if he had been working as an employer or own account worker in that occupation. An own account worker could be both a single worker and/or joint owner of an enterprise (there may be any unpaid family helper working in his enterprise).

An employer is a person who hires one or more employes to assist him in operating his enterprise.

v. Agricultural Labour

A person was treated as agricultural labourer if he followed on or more of the following agricultural occupations in the capacity of labourer on hire or in exchange whether in cash or in kind or partly in cash and partly in kind :

- a. farming, including the cultivation and tillage of soil, etc.,
- b. dairy farming.,
- c. production, cultivation, growing and harvesting of any horticultural commodity.,
- d. raising of livestock, bee-keeping or poultry farming., and
- e. any practice performed on a farm as incidental to or in conjunction with the farm operations (including any forestry or timbering operations and the preparation for market and delivery to storage or to market

or to carriage for transportation of farm products). It might be noted that manual work in fisheries was excluded from the category of agricultural labour.

vi. Agricultural Labour Households :

such of the rural labour households which derived major portion (more than 50 percent) their total income during the last 365 days preceding the date of enquiry from wage paid manual labour in agricultural occupations only were regarded as agricultural labour households.

vii. Rural Labour Household with Land :

Households with cultivated land, either owned or taken on leases, were regarded as household with land. Cultivated land was taken to mean net area owned during the agricultural year i.e. July, 1976 to June, 1977 preceding the year of enquiry and included orchards and current fallows.

viii. Earnings :

Earnings meant payments received in cash or kind or both cash as well as kind or those that were receivable for the work done during the reference week. Earnings in kind included perquisites that a person received customarily for the work performed.

Recurring perquisites included food grains, cooked meals, fuel, tobacco etc., and non recurring perquisites included housing, clothes, shoes, bonus, etc.

ix. Usual Occupation :

The usual occupation of a person was the gainful occupation which he may be pursuing during the major part of the 365 days preceding the date of survey.

X. Children :

Persons below fifteen years of age were treated as children.

xi. Indebted - Households:

A household was considered as indebted household if it had taken loan from others and a part of whole of which had remained outstanding on the date of survey. Loan included borrowing in cash and/or kind and also credit purchases made by the households. If the nature, source and purpose of loans were similar they were treated as a single loan. Borrowing in kind was evaluated at the retail prices prevailing in the local market at the time of borrowing. An advance payment received forward delivery of goods was also regarded as a loan. The dues on items of credit purchases, like newspapers, milk, services of dhobi, etc., were also treated as loans.

1.6 PERIOD OF SURVEY :

The enquiry was integrated with the thirtysecond round of the N.S.S. whose duration from 1st JULY, 1977 to 30th June, 1978, which was divided into 4 sub -rounds of three months each.

1.7 THE SCHEDULE :

Two schedules were canvassed in the enquiry one relating to employment and unemployment, work pattern, earnings and indebtedness and the other relating to household consumption expenditure and income.

1.8 SAMPLE DESIGN AND SIZE :

A stratified two stage sampling design was adopted in the survey with 1971 census villages as the first stage units and households as the second stage units. The sample villages were selected with probability proportional to population and with replacements. The households were selected circular systematically with equal probability after arranging all the households of the second stage units according to their means of livelihood in the order self employed in non-agricultural occupations, rural labour and other. A total of 8,136 sample villages (excluding hilly areas of north eastern states) and 4,740 sample blocks were surveyed.

1.9 ESTIMATION PROCEDURE :

$$Y = y \times \frac{P^*}{P}$$

Y = estimated rural total for any region for any sub-

round/all sub rounds.

y = unestimated rural total of the region for the sub-rounds/all sub-rounds.

P* = projected rural populations of the region for Jan, 1978.

P = total sample persons in the sample villages of the region, surveyed in the sub-rounds/all sub-rounds.

1.10 STRATIFICATION :

The whole of India was divided in a number of basic strata so that it did not cut across district boundaries. Each district with less than 1.5 million rural population according to census 1971 formed one basic stratum by itself except in Gujarat and Arunachal Pradesh where some districts with less than 1.5 million rural population was divided into a number of basic strata, depending on its rural population by grouping contiguous tehsils which were homogeneous as far as possible with respect to rural population, density and crop population. The total number of rural strata thus formed was 516. Within each state and union territory, the total sample villages were allotted to the different rural strata in proportion to their 1971 rural population. The final stratum allocations were made multiples of

4.

CHAPTER - II

THE STRUCTURE OF RURAL LABOUR HOUSEHOLDS

2.1 INTRODUCTION :

Basically, the ultimate sampling units in the Rural Labour Enquiry were the rural labour households each of which has its own characteristics, e.g. its size and composition, its earning strength, its status as regards ownership of land etc. The structure of a household not only reveal its socio-economic status but also provide proper prespective for a study of socio-economic problems. Some of the selected characteristics with regard to the structure of Rural Labour Households are discussed in this chapter prior to analysing the data on employment and unemployment of rural labour households in Chapter III of this report for a better understanding and appreciation of the problem. However, for more details reference may be made to "Rural Labour Enquiry, 1977-78, Report on Wages and Earnings of Rural Labour Households" and "Rural Labour Enquiry, 1977-78, Report on Indebtedness among Rural Labour Households", where in state-wise statements & analysis have been given.

2.2 NUMBER OF RURAL HOUSEHOLDS :

The following table gives details of estimated number of Rural Households and Agricultural and Rural Labour Households at all-India level for all classes.

Estimated Number of Households at All-India level
(In Millions)

Category	1974-75	1977-78	Percentage variation
1.	2.	3.	4.
ALL CLASSES			
Rural Households	82.1	95.7	17
Rural Labour Households	24.8	35.2	42
Agricultural Labour Households	20.7	28.6	38

As may be seen from the table the number of Rural Households in the country, increased from 82.1 million in 1974-75 to 95.7 million households in 1977-78 recording an increase of 17 per cent. However, the number of Rural Labour Households and Agricultural Labour Households have recorded significantly higher increase for the corresponding period.

The following table gives detail of estimated number of Rural Households and Agricultural and Rural Labour Households at all-India level for Scheduled Caste.

	(Million)	(%age)
SCHEDULED CASTE	1974-75	1977-78
Rural Households	15.9	17.9
Rural Labour Households	9.1	11.3
Agricultural Labour Households	8.1	9.8

The Scheduled Castes Households, which constituted about 19 per cent of the total Rural Households in the Country in 1977-78 recorded an increase of 13 per cent over 1974-75. However, the share of Scheduled Caste Rural Labour Households and Agricultural Labour Households accounted for 32 per cent and 34

per cent, respectively. This disproportionate share indicate lower economic status of Scheduled Caste Households in the country. Further, against over all increase of Scheduled Caste Households (13%), in 1977-78 over 1974-75, the rural labour households & Agricultural Labour Households have recorded, an increase of 24 per cent & 22 per cent, respectively for the corresponding period.

The following table gives detail of estimated number of Rural Households and Agricultural and Rural Labour Households at all-India level for Scheduled Tribes.

SCHEDULED TRIBE	(Millions)	(%age)
	1974-75	1977-78
Rural Households	8.3	9.7
Rural Labour Households	2.6	4.2
Agricultural Labour Households	2.1	3.7

It may be seen from the table that the Scheduled Tribe Households in the country which constituted 10 per cent of the total all classes Rural Households in the country increased from 8.3 million in 1974-75 to 9.7 million in 1977-78 registering an increase of 18 per cent. The Scheduled Tribe Rural Labour Households and Agricultural Labour Households which constituted about 12 per cent and 13 percent, respectively of Rural Labour Households and Agricultural Labour Households increased by 64 percent and 79 percent, respectively in 1977-78 over 1974-75 position. The Scheduled Tribe Agricultural Labour Households increased many folds in the states of Rajasthan and Tripura and in Union Territory of Goa, Daman and Diu.

In 1977-78 as the case of 1974-75, about 49 percent of Agricultural Labour Households in the country possessed land and the remaining about 51 percent were without land. Kerala had the highest percentage (about 88 %) and Punjab the lowest (7 %) of Agricultural Labour Households with land in 1977-78.

Similarly about 51 per cent of the total rural households did not possess land and the remaining 49 per cent owned land. As amongst the states Manipur had the highest percentage of Rural Labour Household with land i.e. about 91 per cent and Haryana the lowest i.e. 7 per cent. Amongst Scheduled Caste Agricultural Labour Households at all-India level approximately 43 per cent households owned land in 1977-78 as against 45 per cent in 1974-75. In the case of Scheduled Caste Rural Labour Households these percentages were about 43 and 44 respectively. In the case of Scheduled Caste and Scheduled Tribe Agricultural Labour Households, there has been an increase in the percentage of households owning land during the period 1974-75 to 1977-78 from about 50 to 52 and from 51 to 53 respectively.

2.3 **AVERAGE SIZE OF LAND CULTIVATED AND PERCENTAGE DISTRIBUTION OF ESTIMATED NUMBER OF AGRICULTURAL LABOUR HOUSEHOLDS :**

The following table illustrates the average size of land cultivated by different classes in the Agricultural Labour Households at All-India level.

Category	average size of land cultivated (hectare)	
	1974-75	1977-78
1.	2.	3.
All Agricultural Labour Households	0.45	0.54
Scheduled Caste Agricultural Labour Households	0.36	0.78
Scheduled Tribe Agricultural Labour Households	0.58	0.69

The average size of land cultivated at the All-India level was 0.54 hectare which was higher than the average size of 0.45 hectare in 1974-75. In case of Scheduled Caste Agricultural Labour Households it increased by 117 percent to 0.78 hectare in 1977-78 as against 0.36 hectare in 1974-75. In most of the states the average size of land under cultivation, revealed an increasing trend. In Rajasthan it increased from 1.01 hectares to 1.34 hectares. In Manipur the average size increased from 0.08 to 1.31 hectares, in Haryana from 0.46 to 0.89 hectare and in Gujarat from 0.72 to 0.91 hectare. States which reported average size of land under cultivation above the All-India average of 0.54 hectare were Andhra Pradesh, Gujarat, Haryana, Karnataka, Maharashtra, Manipur, Punjab and Rajasthan. The average size of land cultivated was highest 1.34 in Rajasthan and lowest 0.16 in Kerala. The percentage of households cultivating land was the highest (40.1) in the size class of less than 0.40 and it generally decreased with increase in the size class. The proportion of households cultivating land was quite small (3.2 percent) in the size class of 2.00 hectares and above. This

reveal acute in-equality in distribution of land holdings. At National level, the average size of land cultivated by the above category of households was 0.78 hectares which is higher than the All-India average of 0.54 hectares for all agricultural labour households. Over 1974-75 the average size of land under cultivation by Scheduled Caste Agricultural Labour Households has increased from 0.36 to 0.78 hectare i.e. an increase 117 per cent. Rajasthan, Maharashtra, Karnataka, Haryana and Gujarat are however, the only states that report average size of land cultivated as equal to or greater than the All-India average of 0.78 hectare. Those households cultivating land of the smallest size i.e. less than 0.20 hectare constitute about 42 per cent of all Scheduled Caste Agricultural Labour Households with land at All-India basis. This percentage was higher in 1974-75 (47 per cent). This percentage was as high as 84 per cent in Kerala and was as low as only about 3 per cent in Rajasthan, with an average size of 2.00 hectares or above. In 1974-75 this proportion was only about 2 per cent. However, in Rajasthan in 1977-78 about 27 per cent households were cultivating land of the above mentioned size class and another 27 per cent were cultivating land, the average size of which was from 1.00 to 2.00 hectares. In the states of Assam, Bihar, Himachal Pradesh, Kerala, Tripura, West Bengal and Pondicherry the percentage of households cultivating land in the size class 2.00 hectares and above was zero.

A Scheduled Tribe Agricultural Labour Household on an average cultivated 0.69 hectare of land, which was higher than

the average size of 0.54 hectare cultivated by all Agricultural Labour Households but lower than the average size of 0.78 hectare cultivated by a Scheduled Caste Agricultural Labour Household. In 1974-75 the average size of cultivated land per Scheduled Tribe Agricultural Labour Household was 0.58 hectare. The average size of land cultivated was highest (1.36 hectares) in Karnataka and lowest (0.36 hectare) in Himachal Pradesh. States reporting an average size of land cultivated more than the All-India average of 0.69 hectare were Andhra Pradesh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Rajasthan and Tamil Nadu. The proportion of households cultivating the smallest size class of land was about only 19 per cent whereas it was 42 per cent for Scheduled Caste households, 34 per cent for all agricultural labour households.

2.4 AVERAGE SIZE OF AGRICULTURAL LABOUR HOUSEHOLDS BY SEX :

The following table shows the average size of Agricultural Labour Households by Sex at all-India level.

Category	1974-75				1977-78			
	Men	Women	Children	Total	Men	Women	Children	Total
1.	2.	3.	4.	5.	6.	7.	8.	9.
All Households	1.35	1.37	2.03	4.76	1.35	1.36	1.96	4.67
With Land	1.48	1.47	2.21	5.15	1.48	1.46	2.14	5.09
Without Land	1.24	1.27	1.86	4.38	1.22	1.26	1.78	4.27

The average size of an agricultural labour household at all-India level was 4.67 (2.37 male and 2.30 female). In the case of Scheduled Caste households the average size was 4.69 (2.40 male and 2.29 female) and for Scheduled Tribe household

4.63 (2.32 male and 2.31 female) compared to the period of the last Enquiry (1974-75) there was a decrease in the average size of all categories of households. The decrease was 1.89 per cent in all classes of households, 2.29 per cent in scheduled caste households and 1.27 per cent in scheduled tribe households. However, unlike the all-India trend, in some states like Andhra Pradesh, Himachal Pradesh, Manipur, Rajasthan, there was an increase in the average size of the households. The sex - ratio in all agricultural labour households was 970 females for each 1000 males in 1977-78 as against 975 in 1974-75. The respective figures for scheduled caste households were 964 and 971 and for scheduled tribe households 995 and 971. Apparently the female ratio in the Scheduled Tribe households witnessed an increase unlike in the other categories of the households.

2.5 **AVERAGE EARNING STRENGTH OF AGRICULTURAL LABOUR HOUSEHOLDS BY SEX :**

The 'earning strength' of a household has been taken as the total number of persons reporting 'agricultural labour', 'non-agricultural labour' and /or 'Other Occupations' as their usual occupation. The earning strength of 'all classes' of households on an all-India basis during 1977-78 was 2.13 (1.35 male and 0.78 female) as against 2.33 (1.35 male and 1.00 female) showing thereby a decrease in the earning strength as compared to 74-75. The decrease is attributable to the decline in female participation in the work force. Among States and U.T.s earning strength was the highest i.e. 2.55 in Maharashtra and was the lowest i.e. 1.47 in West Bengal in all classes. In case of the

both Scheduled Caste and Scheduled Tribe households the earning strength of the households showed a decline from 2.37 to 2.13 and from 2.61 to 2.41 respectively. In both these cases also the reason for the decline in earning strength was the decline in female participation in the labour force.

2.6 **AVERAGE NUMBER OF WAGE EARNERS IN AGRICULTURAL LABOUR HOUSEHOLDS :**

Those who reported 'agricultural labour' or 'non-agricultural labour' as his or her usual occupation, was taken to be a 'wage earner'. The average number of wage earners in respect of all classes declined to 1.79 in 1977-78 from 2.24 in 1974-75. The average number of wage earners in all the 3 categories of 'men' 'women' and 'children' declined from 1.22 to 1.07, 0.88 to 0.61 and 0.14 to 0.11 respectively. As between different States the average number of wage earners was highest (2.33) in Maharashtra and was lowest (0.85) in Delhi in respect of all classes of households. In the case of Scheduled Caste Agricultural Labour household at all-India level the average number of wage earners declined from 2.26 in 1974-75 to 1.84 in 1977-78 and in respect of Scheduled Tribe Agricultural Labour households it declined from 2.53 to 2.18 the corresponding period. There was also a decrease in the average number of wage earners in all three classifications of 'men' 'women' and 'children' in both scheduled caste and scheduled tribe Agricultural Labour households.

2.7 **AVERAGE NUMBER OF WAGE EARNERS IN RURAL LABOUR HOUSEHOLDS**

The following table shows the average number of wage earners in Rural Labour households.

Labour Households	1974-75	1977-78
1.	2.	3.
All Rural	2.20	1.70
All Rural (with land)	2.30	1.72
All Rural (without land)	2.07	1.68

The average number of wage earners in Rural Labour households was 1.70 in 1977-78 as compared to 2.20 in 1974-75. Also, the average number of men, women and children declined from 1.23 to 1.03, 0.83 to 0.56 and 0.14 to 0.11, respectively in 1977-78 over 1974-75. The average number of wage earners likewise registered a decline in the case of both Scheduled Caste and Scheduled Tribe Rural Labour households in 1977-78 as compared to 1974-75. The average number of men, women and children wage earners declined in both cases, as well, in the stated period.

CHAPTER = III

EMPLOYMENT AND UNEMPLOYMENT

3.1 INTRODUCTION

In Rural India the economy of wage paid employment is restricted to a relatively smaller section of working population. The measurement of employment and unemployment becomes a complex problem as the concepts and measurement kit used for the purpose in the wage based economy of industrially advanced countries cannot be applied wholly in developing countries for the reason that the categories used for measurement in the wage based economies of developed countries often lose their meanings and significance when applied to the household based rural economies of developing countries. The terms "employment" and "unemployment" when applied to Agricultural Labourer in particular and Rural Labour in general do not have the same meaning or importance as in the case of workers employed in the non-seasonal and organised industries. This is due to the seasonality in agriculture. While in the peak agricultural season almost every person who is in need of a job, is able to get some work, in the agricultural lean season majority of workers, particularly those who depend mainly upon wage paid employment for earning their livelihood, remain either totally unemployed or have to content themselves with some petty jobs resulting in meagre earnings. The job opportunities available outside agriculture within rural areas are inadequate to absorb the labour rendered jobless during lean agricultural season. Thus, the problem of employment in rural areas comes up in the form of what is technically known as visible under employment

i.e., periods of employment are interspersed with spells of unemployment. Variability to these spells is influenced by numerous factors like cropping pattern, climatic conditions, irrigation facilities, pressure of population, avenues for employment outside agriculture, etc. For a proper understanding of the situation of employment in rural areas, it is, therefore, more meaningful to have an estimate of the number of days of employment and unemployment rather than to classify labour force into those employed and unemployed. This had been the basic approach for arriving at the quantitative estimates of employment and unemployment in all the preceding four Enquiries as also the present Rural Labour Enquiry 1977-78 with some important conceptual modifications in the actual methodology adopted particularly in the case of estimation of unemployment, the details of which are given in the following paragraphs.

3.2 **METHODOLOGY FOR QUANTITATIVE ESTIMATES OF EMPLOYMENT AND UNEMPLOYMENT :**

In the first Agricultural Labour Enquiry (1950-51), wage employment for half the day or more was counted as full day's occupation and less than that was ignored. The reference period for recording the information was a month and all those who worked even for a day during this period were taken to have been gainfully employed. In respect of unemployment, firm data were collected only from those adult male labourers who reported wage paid employment in each month. Thus, for those of labourers who did not report wage paid employment, it was assumed that they were self employed for that period. Such persons accounted for about 14 per cent of the total adult male labourers.

Consequently, it was observed that the employment data of the first Agricultural Labour Enquiry were somewhat imprecise and rather tended to be on the higher side. No independent estimate of days of unemployment was attempted to. The days by which the total number of days of wage-paid employment and self-employment fell short of 365 days were treated as the estimated days of unemployment.

During the second Agricultural Labour Enquiry (1956-57), the time spent on different economic activities in which the members of the household were engaged during a reference period of one week was recorded in terms of number of days for which a particular activity was pursued. The basic classifications of activity pattern adopted were "at work"; "Unemployment due to want of work"; "not at work but with job", "enterprise" and "activities outside labour force". The primary classification "at work" was as such divided into wage-employment comprising agricultural labour, non-agricultural labour, employment on salary basis, self employment by way of cultivation of land and other types of self employment. The basic classification "not at work but with job" was sub-divided according to reasons like sickness, weather conditions, ceremonials and rest or holiday. The intensity with which the activity pattern, major or minor, was followed, was also taken into account. For this purpose, four intensity classes were laid down, viz : full, half, nominal and nil. A full day's work meant three-fourth or more of the normal working hours. One-fourth or more and less than three-fourth of normal hours was considered as work with "half" intensity. Less

than one-fourth was deemed as nominal work, with one-eighth intensity, and "nil" intensity signified no work done during the reference period. In the tabulation of employment data, the intensities were duly taken into account. The basis for estimating unemployment during the Rural Labour Enquiry 1974-75 was the same as in the first Rural Labour Enquiry (1963-65) i.e., only those days on which there was no economic activity at all due to non availability of work, were considered the days of unemployment. In other words, days of "nil" intensity had been deemed as days of unemployment and as such, the "days worked" and "days not worked" might not add up to 365.

The first Rural Labour Enquiry conducted in 1963-65 adopted the concepts and methodology used in the second Agricultural Labour Enquiry for ensuring the comparability of results. However, in presenting the data on employment, a slight variation had been introduced. While in the second Agricultural Labour Enquiry the number of days by which the total days employment, and self-employment fell short of 365 were treated as days of unemployment, in the Rural Labour Enquiry, only those days on which there were no economic activity at all due to non availability of work, i.e. days of 'nil' intensity have been deemed as days of unemployment.

The basis for estimating unemployment during 1974-75 survey was the same as in the first Rural Labour Enquiry i.e. only those days on which there was no economic activity at all due to non availability of work. In other words, days of 'nil' intensity have been deemed as days of unemployment.

For the survey conducted in 1977-78, though the basic conceptual frame remained unchanged as that of 27th Round NSS, yet a few changes were made in regard to (i) the definition of 'usual status' for classification of the population based on major activity criterion and (ii) the structure and content of probing questions included in the survey. In addition, attempts were made for the first time during this survey to collect data on the subsidiary gainful status, if any, of persons reporting principal usual status is 'not working' according to the major activity criterion. Thus, the 1977-78 survey provided estimates of two types of 'usually employed' viz; those categorised as working in the principal status and those categorised as 'working' only in a subsidiary status.

The main objective of the Rural Labour Enquiry 1977-78 was to measure, in quantitative terms, the nature and extent of employment and unemployment at disaggregated levels. To achieve this objective, an attempt was made to classify the population as belonging to different activity categories, independently, by using three different approaches, namely (i) the usual status approach, (ii) the current weekly status approach and (iii) the current day status approach. The details of these three different approaches are as under :-

(i) **CLASSIFICATION ACCORDING TO USUAL STATUS APPROACH :**

For classification of population into various activity categories according to usual status, persons were first classified into three major activity status groups, namely, 'working', 'seeking' and/or 'available for work' and 'not

available for work' on the basis of a 'major-time-spent' criterion with reference to the period of 365 days preceding the date of survey. Accordingly a person's status was categorised as under:

'Working' : If one reported to be engaged for a relatively long time during the reference period of 365 days in one or more of the gainful activities ;

'Seeking and/or available for work' : If one was reported to be either 'seeking or available for work' for a relatively long time during the same reference period, and

'Not available for work' : If one was reported to be not available for work during a relatively long time of the reference period of 365 days

Again, within these three broad groups of categories, the detailed activity status categories were then determined by using the 'major time' criterion.

(ii) **CLASSIFICATION ACCORDING TO CURRENT WEEKLY STATUS APPROACH:**

For classification of persons according to current weekly status, he or she had to be assigned a unique activity status with reference to a period of seven days preceding the date of survey. For a person pursuing more than one activity during the week, his/her unique status was decided by adopting a priority-cum-major-time rule. Under the priority rule, the status of 'working' got priority over the status of 'not working but seeking/available for work' which in turn got priority over the status of 'not working and not seeking/available for work'. For a person classified under the first or the last category,

his/her detailed activity status was determined by major-time-spent criterion i.e. the detailed activity on which major time was spent was considered his/her current weekly status. Further, if a person had worked for one hour on any one day of the week he was considered 'working'. A person who had not worked during the week but was available for work even for one hour on any one day of the week was considered, 'seeking and/or available for the work'. Others constituted the category 'not available for work' (or not in labour force). Each person was, thus, assigned a unique activity status for the week. Aggregate of persons under the different activity status provided the distribution of persons by activity on an average in a week of the survey period of one year.

(iii) CLASSIFICATION ACCORDING TO CURRENT DAY STATUS APPROACH :

In adopting the current day status approach attempt was made to account for two major activities pursued by a person on each day of the seven days reference week allocating 'half day' to each activity. The unit of classification according to this approach was, thus, half day though data were collected for all the seven days of the reference week. In assigning the activity status on a day, a person was considered 'working' (or employed) for the entire day if he/she had worked 4 hours or more on the day and assigned the one or two (as the case may be) work activities to which he/she devoted the working time. But if the work was done for one hour or more but less than 4 hours, he/she was considered 'working' (or employed) for half day and 'seeking/available for work' (or unemployed) or 'not available

for work' (or not in labour force) for other half of the day depending on whether he/she was seeking/available for work or not on the day. On the other hand, if a person was not engaged in any gainful work even for one hour on the day ;but was seeking or available for work for four hours or more, he/she was considered 'unemployed' for the entire day. But if the reported availability for work was for less than four hours only, he/she was considered 'unemployed' for half day and 'not in labour force' for the other half of the day. A person who neither was having any gainful work to do nor was available for work even for half of the day was considered 'not available for work (or not in labour force)' for the entire day. The aggregate of person-days so classified under the different activity categories for all the seven days of the week, divided by seven gave the distribution of persons (strictly speaking, person-days) by activity category on an average on a day of the survey period of one year.

3.3 LABOUR TIME DISPOSITION OF USUALLY OCCUPIED PERSONS (BY SEX AND CLASS OF HOUSEHOLDS) :

(a) AGRICULTURAL LABOUR HOUSEHOLDS :

3.3.1. Tables 3.1.1 to 3.1.3 give analysis of the labour time disposition of usually occupied workers belonging to Agricultural Labour households by age and sex, usual occupation and groups of households. Taking all categories of workers and groups of households together the survey results show that the number of days worked increased for all categories except for non-agricultural labour and other occupations under self employment and employment on salary basis. The average number of days worked in 1977-78 for male agricultural labour was about 290 days

as against 247 days in 1974-75. Similar figures for women and child workers were 227 and 303 in 1977-78 as against 179 and 254 days in 1974-75, respectively. Men, women and child workers with land had employment vis-a-vis those without land.

The following table shows the position of average days worked by age and sex for all usual occupations and all Agricultural Labour households.

Category	1974-75	1977-78		
		With land	Without land	All
1.	2.	3.	4.	5.
Men	247	294	285	290
Women	179	230	225	227
Children	254	307	299	303

The increasing trend in overall employment opportunities, observed in the case of all Agricultural Labour households was noticed in scheduled caste and Scheduled Tribe households as well as be would evident from the following table :

Category	Scheduled Caste				Scheduled tribe			
	1974-75	1977-78		All	1974-75	1977-78		All
		With Land	Without Land			With Land	Without Land	
1.	2.	3.	4.	5.	6.	7.	8.	9.
Men	241	287	278	283	270	309	302	306
Women	174	223	220	222	201	236	236	236
Children	251	308	305	307	253	303	298	300

Wage paid employment, as was expected, accounted for as much as 230 days or about 79 per cent of the total work period in respect of men workers belonging to all Agricultural Labour Households. Wage paid employment in respect of their counterparts in Scheduled caste and Scheduled Tribe households accounted for 234 and 235 days in 1977-78 as against 212 and 231 days, respectively in 1974-75. The duration of self-employment in the group "all occupation" has also showed considerable rise from 33 days in 1974-75 to 56 days during 1977-78. Further, in all Agricultural Labour households the duration of self employment for child workers continued to be the largest in "other occupations" and "all occupations" in all the three classes. The duration of self employment was again the largest in 1977-'78 in the occupation group 'Other Occupations' for all types of workers i.e. men, women and children in all classes of households. Though the 'men' workers belonging to Scheduled Tribe Labour households remained employed for 67 days in 1977-78 as against 56 days and 45 days in respect of their counterparts in all communities and Scheduled Caste Households, respectively.

(b) **ALL RURAL LABOUR HOUSEHOLDS**

3.3.2 As between Agricultural Labour households & Rural Labour households, the employment pattern was broadly the same. Tables 3 1.1 to 3.1.3 also give details of employment in respect of usually occupied workers belonging to Rural Labour households.

3.4 **WAGE PAID EMPLOYMENT OF USUALLY OCCUPIED PERSONS BY USUAL OCCUPATIONS, BY SEX AND CLASSES OF HOUSEHOLDS :**

(a) **AGRICULTURAL LABOUR HOUSEHOLDS :**

3.4.1 **WAGE-PAID EMPLOYMENT OF USUALLY OCCUPIED MEN**

Tables 3.2(a). 1M, 2M, and 3M give state-wise details of days of wage-paid employment of usually occupied men belonging respectively to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households.

It may be seen from summary table given below that in 1977-78 the number of days worked in wage-paid employment when compared to the corresponding level in 1974-75 had gone up in all the three groups of households. The relevant figures being 230,234 and 235 days in 1977-78 as against 211,212 and 231 days in 1974-75, respectively for men belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households.

Category (Household)	Agrucultural Labourers		Non-Agricultural Labourers		Other Occupations		All Occupations	
	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78
1.	2.	3.	4.	5.	6.	7.	8.	9.
All	215	242	211	269	45	144	211	230
Scheduled Caste	215	243	206	264	50	152	212	234
Scheduled Tribe	234	246	221	281	41	98	231	235

The above table clearly shows that average annual days of employment from wage employment of usually occupied men

increased more for Scheduled Caste Workers than for other classes as the 10 per cent increase was accounted for by this category in 1977-78 over 1974-75 vis-a-vis 9 per cent increase recorded by all communities taken together and about 2 per cent increase recorded by Scheduled Tribe men workers.

As between the different categories of workers, the non-agricultural labourers were slightly better in so far as the duration of wage paid employment was concerned. They were able to remain so engaged for a little more number of days when compared to agricultural men workers. At All-India level the duration of wage paid days of employment in respect of non-agricultural men labourers belonging to all communities, Scheduled Caste and Scheduled Tribe agricultural labour households was relatively higher in 1977-78. They were able to get wage paid employment for 269,264 and 281 days as compared to 211,206 and 221 day, in 1974-75. The increasing trend in the duration of wage paid employment observed at All-India was due to high increase recorded in number of days of wage-paid employment in the states of Bihar, Jammu & Kashmir, Kerala, Madhya Pradesh, Meghalaya, Orissa and Tamil Nadu. The maximum duration of wage employment (295 days) in respect of all categories of men workers was recorded by Assam followed by Arunachal Pradesh (274 days) and Bihar (266 days) in the case of all Agricultural Labour households.

3.4.2 WAGE PAID EMPLOYMENT OF USUALLY OCCUPIED

WOMEN :

Tables 3.2(a) 1W, 2W and 3W give state wise analysis of wage-paid employment of usually occupied women belonging to all

communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households, respectively.

It would be seen that in 1977-78, the number of days worked in wage-paid employment had increased in respect of usually occupied women workers belonging to all the three groups of these households. The total extent of such days were 184, 186 and 187 days in 1977-78 as against 143, 136 and 168 days in 1974-75, for all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households respectively as the following summary table illustrates.

Category Household	Agrucultural Labourers		Non-Agricultural Labourers		Other Occupations		All Occupations	
	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78
1.	2.	3.	4.	5.	6.	7.	8.	9.
All	149	194	173	262	30	116	143	184
Scheduled Caste	143	193	174	274	25	117	136	186
Scheduled Tribe	169	194	198	266	62	84	168	187

It is evident from the above table that the job opportunities for Scheduled Caste women workers as in case of men, increased more than Tribal or "All communities" categories as the average annual days worked by Scheduled Caste Women recorded 37 per cent increase in 1977-78 over 1974-75 vis-a-vis 11 per cent increase recorded by Scheduled Tribe women and 29 per cent increase registered by women of "All communities".

The Woman Non-Agricultural Labourers in all three classes worked more number of days than woman Agricultural Labourers. The number of days worked by women in all occupations group was much low because of the less working days in 'other occupations' group. In an over all comparison, while all group women worked considerably more number of days, the days worked were far less in the case of Scheduled Tribe woman workers in the group 'other occupations'.

The increasing trend in the duration of wage-paid days of employment observed at All-India level was due to significant increase in the number of days of wage-paid employment in states of Andhra Pradesh, Bihar, Haryana, Kerala, Madhya Pradesh, Meghalaya, Orissa, Punjab, Tamil Nadu, Uttar Pradesh and West Bengal. The maximum duration of wage-employment (365 days) in respect of all categories of woman workers was (excluding Arunachal Pradesh) in Assam (287 days) followed by Meghalaya (253 days) in the case of all Agricultural Labour households. The position relating to Scheduled Caste and Scheduled Tribe Agricultural Labour Households was by and large the same when compared to all community Agricultural Labour households.

3.4.3 WAGE-PAID EMPLOYMENT OF USUALLY OCCUPIED CHILDREN :

Tables 3.2 (a) 1C, 2C and 3C give state-wise analysis of wage-paid employment of usually occupied children belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households, respectively.

It would be noticed that in 1977-78, overall duration of wage-paid employment of children, as in the case of men and women workers, had gone up considerably when compared to the

respective levels obtained in 1974-75. The respective figures in 1977-78 being 186, 199 and 191 as against 171, 172 and 175 in 1974-75 for all communities, Scheduled Caste and Scheduled Tribe households as illustrated below.

Category	Agricultural Labourers		Non-Agricultural Labourers		Other Occupations		All Occupations	
	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78
1.	2.	3.	4.	5.	6.	7.	8.	9.
All	194	252	229	287	36	70	171	186
S.C.	205	262	238	260	34	78	172	199
S.T	184	242	223	263	65	53	175	191

It is seen from the table that the job opportunities for children belonging to Scheduled Caste category increased by 16 per cent as compared to 9 per cent increase registered by children belonging to all communities and Scheduled Tribes.

As between different categories of child workers, non-agricultural labourers were placed in a better position in the groups of 'all communities' and Scheduled Tribe Labour households. In Scheduled Caste households, Agricultural child Labourers had higher days of employment than their 'Non-Agricultural' counter parts.

Amongst States/Union Territories, the maximum extent of wage-paid days of employment of 316 days in respect of all categories of child workers was accounted for by Assam followed distantly by 242 days in West Bengal and 226 days in Madhya Pradesh.

(b) **ALL RURAL LABOUR HOUSEHOLDS :**

3.4.4 As between Agricultural Labour households and all Rural Labour households, there was no significant variation in the duration of wage-paid employment. Tables 3.2 (b) (1M, 2M and 3M), (1W, 2W and 3W) and (1C, 2C and 3C), give the relevant details of wage-paid employment of men, women and children belonging to these households.

3.5 WAGE-PAID EMPLOYMENT OF AGRICULTURAL LABOURERS IN AGRICULTURAL AND NON-AGRICULTURAL OCCUPATIONS :

(a) AGRICULTURAL LABOUR HOUSEHOLDS :

3.5.1 Tables 3.3(a) 1M, 2M and 3M give state-wise details of wage-employment of men Agricultural Labourers according to Agricultural and Non-Agricultural employments. It will be seen that Agricultural Labourers besides being mainly employed in Agricultural occupations were also marginally engaged in non-agricultural pursuits. The data for 1977-78 show that Men Agricultural Labourer in all Agricultural Labour households were employed in agricultural occupations for 229 days out of a total duration of 242 days of wage-paid employment i.e., about 95 per cent of total days of employment was in agricultural occupations as would be seen from the following table.

Category	Agricultural Employment		Non-Agricultural Employment		Total (days)	
	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78
Household						
1.	2.	3.	4.	5.	6.	7.
ALL	193	229	22	13	215	242
S.C	193	230	22	13	215	243
S.T	208	231	26	15	234	246

The days of total wage paid employment and those in Agricultural occupations in respect of Scheduled Caste Agricultural Labour Households were almost identical as in all communities of Agricultural Labour households while in case of Scheduled Tribes Agricultural Labour households, the duration of Agricultural wage-paid employment was 231 days out of 246 days of wage-paid employment.

Tables 3.3 (a) 1W,2W and 3W and 3.3(a) 1C,2C and 3C give similar information for women and child Agricultural Labourers belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households. However, unlike men belonging to Scheduled Caste, the women and children belonging to Scheduled Caste households registered significantly higher increase in terms of full days in the year as compared to women and children belonging to households of All communities and Scheduled Tribes. The number of days of Agricultural wage-paid employment as well as total wage-paid employment of women workers increased during 1977-78 as compared to 1974-75 in all groups of households. Non-Agricultural wage-paid employment accounted for only marginal duration in all groups of households. Almost same trend was observed in case of child workers.

(b) **ALL RURAL LABOUR HOUSEHOLDS :**

3.5.2 Tables 3.3(b) M,3.3(b) W and 3.3(b) C give information in respect of men, women and child Agricultural Labourers belonging to all communities, Scheduled Caste and Scheduled Tribe Rural Labour households. There was not much variation in the pattern of Agricultural and Non-Agricultural wage-paid employments, in these households as also between Agricultural and

Rural Labour households.

3.6 WAGE-PAID EMPLOYMENT OF AGRICULTURAL LABOURERS IN DIFFERENT AGRICULTURAL OPERATIONS

(a) AGRICULTURAL LABOUR HOUSEHOLDS

3.6.1 Tables 3.4(a) 1 to 3 give the distribution of duration of wage-paid agricultural employment in different agricultural operations in respect of usually occupied men belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households, respectively at All-India level. In all the three categories of households in 1977-78 (among specified agricultural operations) "Harvesting" provided the maximum wage-paid employment opportunities. It accounted for 36, 38 and 37 days, respectively in the case of all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households. The next in order came "Ploughing" which accounted for 31, 32 and 27 days, respectively.

Tables 3.4 (a) 1 to 3 also give identical information in respect of usually occupied women and children belonging to these households. "Harvesting" and "Weeding" were the major operations accounting for the maximum duration of wage-paid employment. These together accounted for 78, 76 and 82 days for women and 50, 53 and 54 days in respect of children belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households, respectively. The average days of employment for Women was higher than men in all the three categories in 'Harvesting'. In agricultural occupation, 'Weeding and Harvesting engaged Children for most of the days. It was 50 days for all Agricultural Labour, 53 days for Scheduled Caste

Children and 82 days for Scheduled Tribe Children. Thus the Tribal Children found more employment in Harvesting & Weeding activities than Scheduled Caste and all category Children.

(b) **ALL RURAL LABOUR HOUSEHOLDS :**

3.6.2 Tables 3.4 (b) 1 to 3 give identical information in respect of usually occupied men, women and children belonging to all communities, Scheduled Caste and Scheduled Tribe Rural Labour households. The position was by and large the same as compared to the one prevailing for Agricultural Labour households.

3.7 SELF EMPLOYMENT OF USUALLY OCCUPIED PERSONS :

(a) **AGRICULTURAL LABOUR HOUSEHOLDS**

3.7.1 **SELF-EMPLOYMENT OF USUALLY OCCUPIED MEN**

Tables 3.5(a) 1M, 2M and 3M give state-wise data in respect of self employment of usually occupied men workers belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households. In all community Agricultural labour households, the duration of self-employment showed an upward trend in 1977-78 when compared to the corresponding figures in 1974-75. The number of days of self-employment in the case of usually occupied men belonging to all communities Agricultural Labour households went up from 33 days in 1974-75 to 56 days in 1977-78 and in case of Scheduled Caste and Scheduled Tribe Agricultural Labour households, the duration of self-employment went up from 27 to 45 days and from 35 to 67, respectively for the corresponding period as evident from the following table:

Category	All Occupations					
	Cultivation		Other than Cultivation		Total (days)	
	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78
Household	2.	3.	4.	5.	6.	7.
All	20	46	13	10	33	56
S.C.	15	35	12	10	27	45
S.T.	23	60	12	8	35	67

The nature of self-employment was mostly cultivation of owned or leased-in land by Agricultural Labour Households and it accounted for 46 days out of total of 56 days in respect of usually occupied men belonging to all communities Agricultural Labour Households. A similar comparison of Scheduled Caste and Scheduled Tribe Agricultural Labour households show that they worked in cultivation for 35 and 60 days out of a total self-employment of 45 and 67 days, respectively. A comparison among all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour households show that men workers belonging to Scheduled Tribe Agricultural Labour households were engaged in self-employment for largest number of days in a year.

The states where the days of self-employment of usually occupied men workers belonging to all communities Agricultural Labour Households were more than the All-India figure in respect of usually occupied men were Andhra Pradesh, Gujarat, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Orissa, Rajasthan, Tripura, Uttar Pradesh and Goa, Daman & Diu. The maximum and

minimum days of self employment were reported in the states of Himachal Pradesh (126 days) and Union Territory of Delhi (17 days), respectively. In respect of Scheduled Caste Agricultural Labour households, the States/Union Territories in which the duration of self-employment was above the national average were Himachal Pradesh, Jammu & Kashmir, Madhya Pradesh, Maharashtra, Orissa, Rajasthan, Tripura and Uttar Pradesh. In case of Scheduled Tribe Agricultural Labour households, such states were Andhra Pradesh, Bihar, Gujarat, Meghalaya, Rajasthan, Tamil Nadu, Tripura and Uttar Pradesh.

3.7.2 SELF-EMPLOYMENT OF USUALLY OCCUPIED WOMEN

Table 3.5(a) 1W, 2W and 3W give state-wise details of duration of self employment in respect of usually occupied women belonging respectively to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households. All-India figure indicating the duration of self-employment of women registered upward trend in all the three groups of households. The figures of the durations being 41,35 and 47 days in 1977-78 as against 35,38 and 36 days in 1974-75 in respect of usually occupied women belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households respectively.

The following summary table gives average annual days of self-employment of usually occupied women for general, Scheduled Caste and Scheduled Tribe categories of Agricultural Labour Households.

Category	All Occupations					
	Cultivation		Other than Cultivation		Total (days)	
	1974-75	1977-78	1974-75	1977-78	1974-75	1977-78
Household						
1.	2.	3.	4.	5.	6.	7.
All	16	33	19	8	35	41
S.C.	15	28	23	7	38	35
S.T.	19	39	17	8	36	47

The maximum number of days of self-employment of women workers belonging to all communities labour households was reported by Himachal Pradesh (183 days). Other States/Union Territories wherein the self-employment of women workers was above the All-India level were Gujarat, Haryana, Jammu & Kashmir, Manipur, Meghalaya, Orissa, Punjab, Rajasthan, Tripura, Uttar Pradesh, Delhi and Goa, Daman & Diu. The minimum number of days of self-employment by women workers was reported by Assam (10 days).

3.7.3 SELF-EMPLOYMENT OF USUALLY OCCUPIED CHILDREN

Table 3.5(a) 1C, 2C and 3C give identical details regarding duration of self-employment in respect of usually occupied children. The duration of self employment in case of usually occupied children had gone up in 1977-78 as compared to 1974-75 in respect of all groups of Agricultural Labour households. The respective figures being 111, 103 and 104 days in 1977-78 as against 78, 76 and 69 days in 1974-75.

The following summary table gives average annual days

of self-employment of usually occupied children belonging to Agricultural Labour Households in-respect of general, Scheduled Caste and Scheduled Tribe categories :

Category Household	All Occupations					
	Cultivation		Other than Cultivation		Total (days)	
	1974- 75	1977- 78	1974- 75	1977- 78	1974- 75	1977- 78
1.	2.	3.	4.	5.	6.	7.
All	25	105	53	6	78	111
S.C.	17	97	59	6	76	103
S.T.	33	98	36	6	69	104

During 1977-78 there has been steep decline in employment in other than cultivation in-respect of all categories.

The duration of self-employment of children belonging to all communities Agricultural Labour households was the largest in the case of Himachal Pradesh (297 days). The other States/Union Territories where this duration was above the national average were Haryana, Jammu & Kashmir, Kerala, Meghalaya, Punjab, Rajasthan, Tamil Nadu and Uttar Pradesh. On the other hand, the shoratest duration of self-employment of children of all Agricultural Labour households was reported as 10 days in Assam.

(b) **ALL RURAL LABOUR HOUSEHOLDS**

3.7.4 Tables 3.5 (b) iM, 2M and 3M, 1W, 2W and 3W and iC, 2C and 3C give state-wise data in respect of usually occupied men, women and children belonging to all communities, Scheduled Caste

and Scheduled Tribe Rural Labour households respectively. The position in respect of the duration of self-employment in the case of usually occupied persons belonging to these households was not much different from what was noticed in the case of Agricultural Labour households.

3.8 UNEMPLOYMENT OF USUALLY OCCUPIED PERSONS

3.8.1 The term employment connotes only those days on which the worker was available for work but there was no economic activity at all due to non-availability of work. Absence from work could be either due to non-availability of work or non-availability of persons to work for reasons such as sickness, bad weather, festival, etc., the estimate for the two have been presented separately. Only the former has been taken as unemployment. Table 3.6 gives the estimate of the number of days on which there was no economic activity at all.

(a) AGRICULTURAL LABOUR HOUSEHOLDS

3.8.2 UNEMPLOYMENT OF USUALLY OCCUPIED MEN

Table 3.6(a) 1M, 2M and 3M present State-wise data of duration of unemployment in respect of usually occupied men belonging to all communities, Schedule Caste and Scheduled Tribe Agricultural Labour households. Taking into consideration all communities: Agricultural Labour Households at National level, the number of days not worked by agricultural labourers, decreased considerably to 78 days in 1977-78 from 103 days in 1974-75. Out of 78 days in 1977-78, 50 days were on account of non-availability of work and as such constituted the hard core of unemployment duration. The remaining 28 days were attributed to

unemployment due to reasons such as sickness, bad weather, festivals, marriages, etc. The corresponding figures in case of Scheduled Caste and Scheduled Tribe Agricultural Labour Households were 83 and 29 days respectively in 1977-78 as against 101 and 28 days in 1974-75 which also shown a downward trend in the number of days when no economic activity was pursued. The downward trend was noticed in the unemployment duration figures in respect of categories 'non-agricultural', 'other' and 'All Occupations' in all the three community groupings except in the case of 'Other Occupations' with category of men belonging to Scheduled Caste Agricultural Labour Household, where it showed a slight increase. States where the number of days 'not worked' in respect of agricultural labourers belonging to All Agricultural Labour Households much above the all-India level (i.e., 78 days) were Andhra Pradesh, Haryana, Kerala, Manipur, Rajasthan, Tamil Nadu, Delhi, Goa, Daman & Diu and Pondicherry. In the case of Scheduled Case Agricultural Labour Households, the number of days not worked were higher in the states of Gujarat, Haryana, Jammu & Kashmir, Kerala, Maharashtra, Rajasthan, Tamil Nadu, Delhi and Pondicherry than the all-India figure of 85. A slightly different set of states were on the high side in the case of Scheduled Tribe Agricultural Labour Household viz. Andhra Pradesh, Gujarat, Kerala, Orissa, Punjab, Rajasthan, Tamil Nadu, West Bengal, Delhi and Goa, Daman & Diu. The all-India figure was 61 days. Generally, 'want of work' has mainly been responsible for increase in number of days of unemployment among men workers of all categories of households.

3.8.3. UNEMPLOYMENT OF USUALLY OCCUPIED WOMEN

Tables 3.6 (a) 1W, 2W and 3W give state-wise details of duration of unemployment in respect of usually occupied women belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households. The duration of number of days not worked by woman agricultural labourers also reported a downward trend in case of all the three groups of households, the figures being 143, 150 and 130 days in 1977-78 as against 171, 172 and 157 days in 1974-75 belonging respectively to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households. The number of days of unemployment in the case of woman workers was quite higher than those of men workers in all the three categories of Agricultural Labour Households. Unemployment due to 'want of work' in case of women agricultural labourers was reported as high as 52, 57 and 34 days in 1977-78 as compared to 124, 129 and 120 days in 1974-75 respectively, in respect of all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households.

In the case of woman agricultural labourers belonging to all Agricultural Labour Households, the maximum number of days of unemployment was reported by Delhi while Assam reported minimum number of days of unemployment. The significant point to be noted is: that average number of days of unemployment 'due to want of work' in case of woman workers was comparatively higher than those of men and children belonging to three groups of households.

3.8.4 UNEMPLOYMENT OF USUALLY OCCUPIED CHILDREN :

Tables 3.6 (a) 1C, 2C and 3C give similar details regarding duration of unemployment in respect of usually occupied children belonging to all communities, Scheduled Caste and Scheduled Tribe Agricultural Labour Households. The duration of days 'not worked' in case of child agricultural labourers also had come down in 1977-78 as compared to 1974-75 in respect of all groups of Agricultural Labour Households. The respective figures being 81, 73 and 83 days in 1977-78 as against 107, 105 and 105 days in 1974-75. The maximum duration of days 'not worked' was reported in Himachal Pradesh (213 days) and lowest in Punjab (39 days) in the case of child agricultural labourers belonging to all Agricultural Labour Households. Though the general trend was similar in other categories, the Scheduled Caste child agricultural labourers registered maximum days of unemployment in Himachal Pradesh and minimum in West Bengal and Haryana whereas in the case of Scheduled Tribe, the maximum number of days 'not worked' was in Goa, Daman & Diu and the minimum days were reported in West Bengal.

(b) RURAL LABOUR HOUSEHOLDS

3.8.5 Tables 3.6(b) 1M, 2M and 3M, 1W, 2W and 3W, and 1C, 2C and 3C give state-wise data on unemployment in respect of usually occupied men, women and children belonging respectively to all communities, Scheduled Caste and Scheduled Tribe Rural Labour Households. The down ward trend noticed in the number of days of unemployment in case of usually occupied persons belonging to

Agricultural Labour Households was evident in respect of these Rural Labour households as well. In all cases, the number of average annual days of unemployment was found to be low in 1977-78 as compared to 1974-75 for men workers belonging to all communities, Scheduled Caste and Scheduled Tribe Rural Labour Households. The number of days of unemployment due to 'want of work' was also reported low in 1977-78 as compared to 1974-75 in case of all categories of workers relating to Rural Labour Household:.

भारत सरकार, राष्ट्रीय प्रतिदर्श सर्वेक्षण संगठन
GOVERNMENT OF INDIA, NATIONAL SAMPLE SURVEY ORGANISATION

सामाजिक-आर्थिक सर्वेक्षण
SOCIO-ECONOMIC SURVEY

ग्रामीण Rural*
नगरीय Urban

पारिवारिक क्रमसूची 10 : लोकनगर तथा बेरोजगारी

HOUSEHOLD SCHEDULE 10 : EMPLOYMENT & UNEMPLOYMENT

वर्षोत्सव की : 1977-78

THIRTY-SECOND ROUND : 1977-78

[1] प्रतिदर्श परिवार की पहचान
identification of sample household

1. क्रम संख्या serial number		11. तहसील/नगर tehsil/town	
2. परिसर-राज्य-क्षेत्र zone-state-region		12. गांव का नाम name of village	
3. स्तर stratum		13. खेड़ा (खेड़े) hamlet(s)	
4. उप-प्रतिदर्श sub-sample		14. खेड़े की पहचान : वार्ड-अन्वेषक इकाई-खंड/प्रकार-मंडल खंड block identity + ward, inv. unit block/charge-circle block	
5. प्रतिदर्श गाँव/ब्लॉक संख्या sample village/block no.		15. मकान संख्या house number	
6. उप-दौर sub-round		16. मुखिया का नाम name of head	
7. प्रतिदर्श परिवार संख्या sample household no.		17. सूचक का नाम name of informant	
8. पारिवारिक प्रकार (संकेतिक) household type (code)		18. सूचक का मुखिया से सम्बन्ध (संकेतिक) informant's relation to head (code)	
9. राज्य state			
10. जिला district			

[2] क्षेत्र कार्य का विवरण
particulars of field work

पदाधिकारी official	नाम name	तिथि date(s) of				हस्ताक्षर signature
		सर्वेक्षण/निरीक्षण survey/inspection	प्राप्ति receipt	समीक्षा scrutiny	प्रेषण despatch	
1. अन्वेषक investigator			X	X		
2. सहायक पदाधिकारी asstt. supd.						
3. अधीक्षक superintendent						

* जो लागू न हो, काट दीजिए।
* delete whichever is not applicable.

[3] परिवार तथा गाँव के लक्षण
household and village characteristics

1. परिवारिक आकार household size					
2. आर्थिक रूप से सक्रिय व्यक्तियों की संख्या (आर्थिक स्तर) number of persons economically active (usual status)	(i) पुरुष male		6. परिवारिक धारित भूमि (एकड़ 0.00) household land possessed (acres 0.00)	(i) स्वामिकृत owned	
	(ii) स्त्री female			(ii) पट्टे पर ली गई leased in	
	(iii) जोड़ total			(iii) पट्टे पर दी गई leased out	
3. परिवार का प्रमुख उद्योग व्यवसाय (संकेतांक) household principal industry-occupation (code)				(iv) कुल धारित total possessed (i) + (ii) + (iii)	
4. परिवार का गौण उद्योग व्यवसाय (संकेतांक) household subsidiary industry-occupation (code)			7. परिवारिक कुल भूमि (एकड़ 0.00) household land cultivated (acres 0.00)		
5. वासभूमि प्रकृत (स्वामिकृत-1, अन्य-2) homestead type (owned-1, others-2)			8. परिवारिक सिंचित भूमि (एकड़ 0.00) household land irrigated (acres 0.00)		
			9. परिवारिक वर्ग (संकेतांक) household group (code)		
			10. परिवारिक प्रति व्यक्ति मासिक व्यय-भत माह (₹ 0.00) household monthly per capita expenditure - last month (Rs. 0.00)		
			11. ग्राम सिंचाई प्रकृत (संकेतांक) village irrigation type (code)		
			12. ग्राम फसल प्रतिमान (संकेतांक) village crop pattern (code)		

[5] तारीख की समाप्त सप्ताह की शक्ति में व्यक्तिगत शक्ति में व्यक्तियों का समय विन्यास

time disposition of persons in labour-force during the week ended on.....

शक्ति 4 के अनुसार क्रम संख्या serial number as in block 4	प्रारंभिक कार्यकाल usual activity		वर्तमान कार्यकाल current activity												संदर्भ सप्ताह में प्रत्येक कार्यकाल में दिनों की कुल संख्या total number of days in each activity during the reference week		सप्ताह के दौरान किए गए कार्य के लिए (प्राप्त अथवा प्राप्य) मजदूरी और वेतन का उपार्जन (₹ 0.00) wage and salary earnings (received or receivable) for the work done during the week (Rs. 0.00)		
	स्थिति (संकेतिक) status (code)	उद्योग (अथ संकेतिक) industry (div. code)	कार्यकाल की क्रम सं. ser. no. of activity	स्थिति (संकेतिक) status (code)	उद्योग कोड (संकेतिक) industry (div. code)	संचालन (संकेतिक) operation (code)	सप्तम दिन	षष्ठ दिन	पांचवां दिन	चौथ दिन	तीसरा दिन	दूसरा दिन	प्रथम दिन	पूर्ण full	आधा half	नकद cash	वस्तुस्थिति kind	कुल total	
							सप्ताह दिन seventh day	छठा दिन sixth day	पांचवां दिन fifth day	चौथ दिन fourth day	तीसरा दिन third day	दूसरा दिन second day	प्रथम दिन first day						
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19
							1.0	1.0	1.0	1.0	1.0	1.0	1.0						
			जोड़ total				1.0	1.0	1.0	1.0	1.0	1.0	1.0						
							1.0	1.0	1.0	1.0	1.0	1.0	1.0						
			जोड़ total				1.0	1.0	1.0	1.0	1.0	1.0	1.0						
							1.0	1.0	1.0	1.0	1.0	1.0	1.0						
			जोड़ total				1.0	1.0	1.0	1.0	1.0	1.0	1.0						

[8] प्राथमिक कार्यकलाप स्तर संकेतांक 01-93 वाले व्यक्तियों के लिए भर्तुवर्ती प्रश्न
Follow-up questions for persons having usual activity status codes 01-93

<p>1. खंड 4 के अनुसार क्रम संख्या serial number as in block 4</p>				
<p>2. प्राथमिक स्तर—उद्योग (संकेतांक) usual status—industry (code)</p>				
<p>3. वर्तमान स्तर—उद्योग (संकेतांक) current status—industry (code)</p>				
<p>4. क्या आप कार्य/अतिरिक्त काम की खोज में अथवा के लिए उपलब्ध थे? (हां-1, नहीं-2) were you seeking or available for work/additional work? (yes-1, no-2)</p>				
<p>5. क्या आप सर्वप्रथम बार काम की खोज में अथवा के लिए उपलब्ध थे? (हां-1, नहीं-2) [केवल प्राथमिक कार्यकलाप स्तर संकेतांक 81 वाले व्यक्तियों के लिए] were you seeking or available for work for the first time? (yes-1, no-2) [for persons with usual activity status code 81 only].</p>				
<p>6. यदि प्रश्न 4 के उत्तर 'हाँ' हो आपने कार्य/अतिरिक्त काम प्राप्त करने के लिए क्या प्रयत्न किये? (रोजगार कार्यालय के चालू रजिस्टर में दर्ज-1, अन्य प्रयत्न किए-2, कोई प्रयत्न नहीं किया-3) if 'yes' against question 4 what efforts did you make to get work/additional work? (currently in the live register of the employment exchange-1, made other efforts-2, made no efforts-3).</p>				
<p>7. कितने समय तक आप काम की खोज में अथवा काम के लिए उपलब्ध रहे? (3 माह तक-1, 3-6 माह-2, 6-12 माह-3, 12 माह से अधिक-4) how long were you seeking or available for work (upto 3 months-1, 3-6 months-2, 6-12 months-3, more than 12 months-4).</p>				
<p>8. आपने किस प्रकार के काम की खोज की अथवा किस प्रकार के काम के लिए उपलब्ध थे? (कृषि तथा गैर-कृषि दोनों ही कार्य-1, केवल कृषि कार्य-2, केवल गैर-कृषि कार्य-3, सार्वजनिक कार्य-4, कोई अन्य कार्य-5) what type of work did you seek or were available for? (both farm and non-farm work-1, farm work only-2, non-farm work only-3, public works-4, any other work-5).</p>				

<p>9. [प्रश्न 8 के उत्तर सही ढंग से लिखें।] गैर-कृषि कार्य का क्षेत्र जिसकी शोख में अथवा जिसके लिए उपलब्ध थे (राष्ट्रीय शोखों के वर्गीकरण-1970 के अंतर्गत 1-9 के अधीन उद्योग समूह संकेतों के लिए) (for codes 1 & 3 against question 8) sector of non-arm work sought or were available for : (industry group codes under divisions 1-9 of NIC 1970)</p>					
<p>10. किस स्तर के काम में शोख में अथवा के लिए उपलब्ध थे ? मजदूरी/वैतनिक रोजगार : पूर्ण कालिक-1, अर्ध कालिक-2 क्रेता/कामगार दर : पूर्ण कालिक-3, अर्धकालिक-4 स्वतंत्रता : पूर्ण कालिक-5, अर्धकालिक-6 status of work sought or were available for ? wage/salaried employment : full-time-1, part-time-2 contract/pece rate : full-time-3, part-time-4 self employment : full-time-5, part-time-6</p>					
<p>11. यदि शोख में ही या शोख/वैतनिक रोजगार की शोख में ही, तो आपकी क्या स्वीकार्य है ? (1) दैनिक मजदूरी (रु० 0.00) (2) मासिक वेतन (रु० 0.00) if wage/salaried employment sought within the village what is your acceptable ? (i) daily wage (Rs. 0-00) (ii) monthly salary (Rs. 0-00)</p>					
<p>12. क्या आप अपने गाँव/नगर के बाहर मजदूरी/वैतनिक रोजगार के इच्छुक हैं ? (हां-1, नहीं-2) are you willing to accept wage/salaried employment outside your own village/town ? (yes-1, no-2)</p>					
<p>13. यदि प्रश्न 12 के उत्तर हाँ ही, तो आपकी क्या स्वीकार्य है ? (1) दैनिक मजदूरी (रु० 0.00) (2) मासिक वेतन (रु० 0.00) if 'yes' against question 12, what is your acceptable ? (i) daily wage (Rs. 0-00) (ii) monthly salary (Rs. 0-00)</p>					

[9] आधिकारिक स्तर संकेतांक 92 तथा 93 वाले व्यक्तियों के लिए अनुसूची प्रश्न
follow-up questions for persons having usual activity status codes 92 & 93

1. खंड 4 के अनुसार क्रम संख्या serial number as in block 4					
2. आधिकारिक स्तर (संकेतांक) usual status (code)					
3. वर्तमान स्तर/उद्योग (संकेतांक) current status—industry (code)					
4. क्या आपके अपने अधिकारित व्यक्तित्व-दिनस प्रायः वर्ष भर घरेलू काम-काज में ही बिताने पड़े ? (हां-1, नहीं-2) were you required to spend most of your person—days on domestic duties almost throughout the year ? (yes-1, no-2).					
5. घरेलू काम-काज में ही प्रायः आपके लगे रहने का क्या कारण था ? (घरेलू काम-काज की अनिवार्यता-1, अजैक काम लगे की अनुपलब्धता-2) what was the reason for your usual attachment to domestic duties ? (pressing need for domestic work-1, non-availability of gainful work-2)					
6. अपने घरेलू काम-काज के साथ क्या आपने निम्न काम नियमित रूप से किये : along with your domestic duties did you also regularly carry out :					
(i) पारिवारिक उपभोग के लिए मछली, छोटे पिकार, बंद फल, मात-मच्छी, आदि का निःशुल्क संग्रह ? (हां-1, नहीं-2) free collection of fish, small games, wild fruits, vegetables etc. for household consumption ? (yes-1, no-2)					
(ii) पारिवारिक उपभोग के लिये ईंधन की लकड़ी, गोबर, गधु-बाह्वार, आदि का निःशुल्क संग्रह ? (हां-1, नहीं-2) free collection of fire-wood, cow-dung, cattle feed etc. for household consumption ? (yes-1, no-2)					
(iii) रसोई बगइचा, फलोंबगीचा, आदि का अमरक्षण ? (हां-1, नहीं-2) maintenance of kitchen gardens, orchards etc? (yes-1, no-2)					
(iv) पारिवारिक कुक्कुड़ पालन, डेरी, आदि का कार्य ? (हां-1, नहीं-2) work in household poultry, dairy etc.? (yes-1, no-2)					

<p>(v) शारीरिक उपयोग के लिए सिलाई, धुलाई का काम, बुनाई प्रादि ? (हां-1, नहीं-2) sew ag, tailoring, weaving etc. for household use ? (yes-1, no-2)</p>					
<p>(vi) बच्चों की पढ़ाई (हां-1, नहीं-2) tu oring of children ? (yes-1, no-2)</p>					
<p>(vii) गांव के बाहर से पानी लाया (हां-1, नहीं-2) bringing water from outside the village ? (ye -1, no-2)</p>					
<p>7. बरेलू काम बाज में पहले से ही व्यस्त होने के बावजूद भी क्या आप काम लेने के लिए तैयार हैं, यदि काम आपके घर पर ही उपलब्ध कर दिया जाये ? (हाँ-1, नहीं-2) inspite of your pre-occupation in domestic duties, are you willing to accept work if work is made available at your household ? (yes-1, no-2)</p>					
<p>8. यदि प्रश्न 7 के समझा 'हां' हो आपको स्वीकार्य काम का स्वरूप (नियमित पूर्णकालिक-1, नियमित अर्धकालिक-2, अर्ध-काल पूर्णकालिक-3, अर्ध-काल अर्धकालिक-4) <u>if 'yes' answer question 7</u> the nature of work acceptable to you (regular full-time-1, regular part time-2, occasional full-time-3, occasional part-time-4)</p>					
<p>9. आपको स्वीकार्य काम की किसमें [दही-1, कुकुरट पालन-2, गाय व भू पालन-3, कढ़ाई तथा बुनाई-4, काष्ठ तथा रेश की वस्तुओं का निर्माण-5, धुई का काट-6, लकड़ी के सामान का निर्माण तथा मरम्मत-7, अन्य (निर्दिष्ट करें) -8] the type of work acceptable to you [dairy-1, poultry-2, other animal husbandry-3, spinning and weaving-4, manufacturing wood and cane products-5, tailoring-6, leather goods manufacturing and repairing-7, others (specify)-8]</p>					
<p>10. क्या उस काम के लिए आपके पास कोई कौशल/अनुभव है ? (हां-1, नहीं-2) do you have any skill/experience to undertake that work ? (yes-1, no-2)</p>					
<p>11. उस काम के लिए आपको किस सहायता की आवश्यकता है ? (निम्नी सहायता की नहीं-1, आसान शर्तों पर आरंभिक निस्त-2, कार्यशील निस्त सुविधा-3, कच्चे माल की आसान उपलब्धि-4, सुनिश्चित बाजार-5, प्रशिक्षण-6, आवास-7) what assistance do you require to undertake that work ? (no assistance-1, initial finance on easy terms-2, working finance facilities-3, easy availability of raw materials-4, assured market-5, training-6, accommodation-7)</p>					

[10] पारिवारिक ऋणबद्धता (केवल ग्रामीण श्रमिक परिवारों के लिए)
 household indebtedness (for rural labour households only)
